• MODULE FEATURES

High Efficiency
PERC technology improves efficiency, increases power generation, and contributes to lower LCOE.

Lower Heat Spot Risk
Innovative circuit design and "Half Cell" structure decrease the temperature of heat spots and effectively reduce power loss.

Excellent Low-light Performance
Reliable performance in low-light conditions such as in the morning,at dusk or during raining days.

Resilient to Extreme Weather
Carefully selected materials ensure the module still works well under the condition of 2400Pa wind load and 5400Pa snow load.

PID Resistant
High quality solar cell and advanced processing technology contribute to excellent PID resistance performance.
