NEOSUN NS-275M | 285M | 290M

This Monocrystalline Solar PV Module with 5BB A-Grade cells offers the highest cell performance efficiency of up to 20.2% (17.8% module efficiency) and an excellent aesthetic appearance, making it perfect for rooftop installation where good design is important.

With its long service life and low cost these solar panels are great choice either for big solar power plant or for small house.

EXCELLENT CELLS EFFICIENCY

We use only 5BB Grade-A Cells with efficiency up to 20.2% achieved through advanced cell manufacturing technology

EXCELLENT WEAK LIGHT PERFORMANCE Solar modules from NEOSUN Energy have excellent weak light performance (morning, evening and cloudy days)

+8W

POSITIVE POWER TOLERANCE Guarantee from 0 to +8W as power tolerance, you can obtain more power than conventional output

SAND AND SALT PROTECTION Reliable quality leads to a better sustainability even in harsh environment

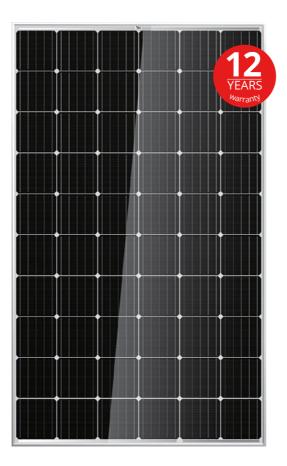

like desert or coastline

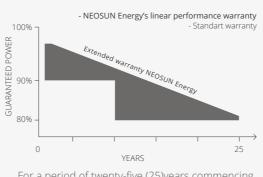

PANEL THICKNESS The latest technologies allow us to make thin and light solar modules. Easy installation and transportation

HIGH WIND AND SNOW RESISTANCE

NEOSUN Energy modules withstand snow load of up to 550 kg/m² and wind speed of up to 162km/h

For a period of twenty-five (25)years commencing

on the Warranty Start Date, loss of power output

of the nominal power output measured at Standard Test Conditions (ST C) for the Product(s) shall not exceed:

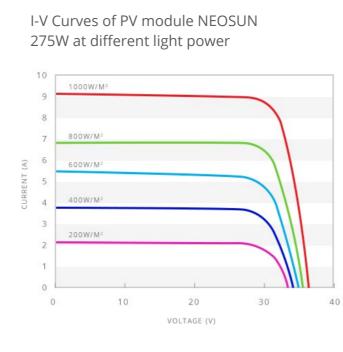

1. For Polycrystalline Products: 2% in the first year, thereafter 0.67% per year.ending with 82% in the 25th year after the Warranty Start Date.

2. For Monocrystalline Products: 3 % in the first year, thereafter 0.67% per year, ending with 81 % in the 25th year after the Warranty Start Date.

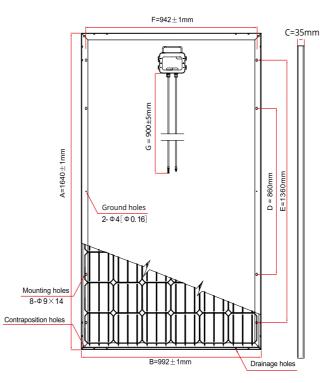

The Warranty Start Date shall be defined as the date of the Bill of Lading date
