

SASA SMART HOT-SPOT FREE MODULE

SS SMM6-60 Series 275W-300W

ILLUSTRATION ONLY

275W
-
300W

POWER RANGE
Plus-Sorting 0 to + 4,99Wp

PID
FREE

PID RESISTANT
Potential Induced Degradation Free

SALT CORROSION RESISTANT
Certified for Salt Rich Environment

SAND RESISTANT
Certified for Sand Rich Environment

NH₃
S

AMMONIA RESISTANT
Certified for Ammonia Rich Atmosphere

HIGHLY STABLE AND TOUGH
Maximum Mechanical Load 5400 Pa

We produce with green energy!

✓ GERMAN QUALITY
Sasa Solar photovoltaic modules are manufactured using high-quality materials, automated machine, German Technology and Standards

+ PLUS-SORTING
Higher yield due to plus-sorting of 0 to +4.99 Wp guarantees the high system efficiency and yield stability

↑ PERFORMANCE GUARANTEE
Sasa Solar assures high investment, security and warranty claims by providing linear performance guarantee of 30 years and 12 years of product warranty

📄 CERTIFICATES
Lining with International Standards, Sasa Solar Photovoltaic modules are tested and certified under extreme stress and it can bear harsh environmental influences

OUR PERFORMANCE GUARANTEE

22 Sin Ming Lane, #06-76 Midview City
Singapore 573969

Temp. coefficient Isc	(% / °C)	0.06					
Temp. coefficient Pm	(% / °C)	-0.36					
Operating temp.	(°C)	-40 to +85					
NOCT	(°C)	45±2					

The electrical data apply to standard test conditions (STC): Irradiance of 1000 W/m² with spectrum AM 1.5 and a cell temperature of 25°C.

TECHNICAL DATA

Junction box	3 bypass diodes, IP 67
Wire cross section (∅, mm ²)	4.0
Cable length (mm)	900
Connector type	MC 4 / MC 4 compatible
Dimensions (L x W x H, mm)	1674 x 992 x 35
Weight (kg)	18.6
Specification (mm)	Mono 156 / 6 x 10
Hail resistance	Max. ∅ 28 mm, at 23 m/s
Wind load	2400Pa / 244kg / m ²
Mechanical load	5400Pa / 550kg / m ²

SCALE

PACKAGING INFORMATION

Packing Configuration	62pcs / pallet
Loading Capacity	868pcs / 40HQ
Size / pallet (mm)	1710 x 1135 x 2325
Weight	1270kg / pallet

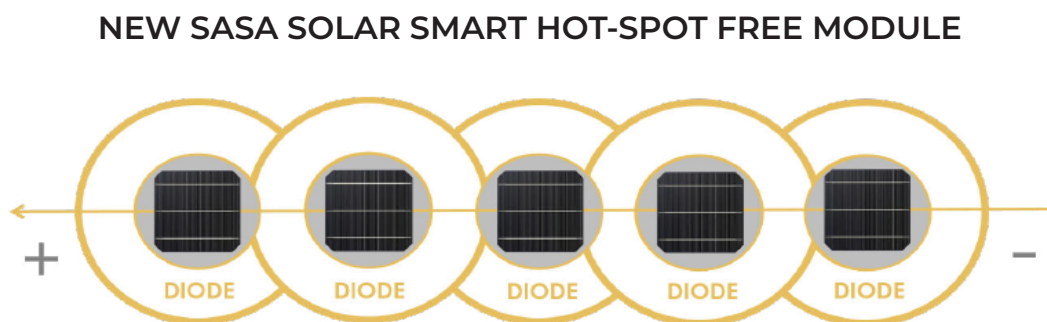

Sasa Smart Module

Maximize Solar Module Power

SASA SMART HOT-SPOT FREE technology protects each cell by an individual bypass diode

SASA Smart Module technology protects each cell by an individual bypass diode. When the current of a single cell does not match the current of the whole string, that cell has a reverse voltage, when measured more than 0.6V, it will automatically activate the bypass diode. As a result, the rest of the cells will not be affected by the disruption. The heated cell will consume less energy generated by the unaffected cells, and produce less heat. Meanwhile, only the heated cell will be bypassed, and the rest of good cells will continue generating power.

INCREASED EFFICIENCY AND YIELD

This new technology prevents instant falls in the module output, thus increasing the performance ratio up to 30%. The SASA Smart module loses the output of only one single cell during the shading, while a standard module will lose output of all cells in a string.

SAFETY AND RELIABILITY

With lower operating temperature less than 85°C, SASA Smart module not only eliminates potential causes for back sheet degradation but also prevents damage to silicon-based cells, hence enhancing reliability and ensuring more safety of the module.

ENHANCED LIFETIME

The lifetime of SASA Solar Hot-Spot Free Module is up to 25 years over standard warranty term of modules on the market.

MORE SOLAR POWER

When multiple cells are in shading, a hot-spot free module can generate up to 80% more power, compared to a standard module.
