MONOCRYSTALLINE

With the first Monocrystalline power plant being built 30 years ago, and continuing to run to date, this is why we are an advocate of monocrystalline solar technology. Link Energy selected Monocrystalline as its primary product due to its longevity effectiveness and better return of investment.

▲ PID Resistance : eliminating the possibility of Potential Induced Degradation

4 Bus Bar : improves the efficiency of the panels and better appearance

Highest efficiency up to 17.11%

Certified to withstand increased snow loads of up to 5400Pa

Good pressure resistance and able to bear 2400Pa wind load

Outstanding efficiency in low light conditions

Sorted by Amperage, this reduces losses and maximises output ▲
