

Over 30 years manufacturing experience, the complete PV chain including silicon materials, wafer, solar glass,solar cell, solar module and solar project, and IS09001 &ISO14001 certified factory, ensure excellent raw materials and production control.

Solar modules certified by TUV Rheinland (IEC61215& IEC61730) in the extreme conditions (Temperature, load, impact) with good performance.

The good weak light performance (morning, evening and cloudy days) has been tested and approved by professional third-party.

Guarantee from 0 to +6W as power tolerance, customer can obtain 5.8% power more than conventional output.

100% EL test before and after lamination, and finished products EL test, providing higher quality assurance.

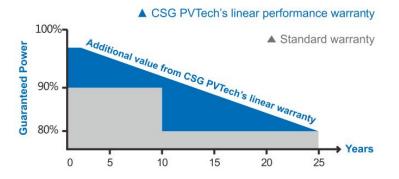

High Efficiency Poly-Crystalline Solar Module

Warranty: For a period of 25 years commencing on the warranty start date, loss of power output of the nominal power output measured at STC for the products shall not exceed:

- 1. For polycrystalline products: 2.5% in first year, therefore 0.7% per year, ending with 80.7% in the 25<sup>th</sup> year.
- 2. For monocrystalline products:3% in first year, therefore 0.708% per year, ending with 80% in the 25th year.

| Typical Electrical Characteristics |                                  |      |      |      |      |      |  |
|------------------------------------|----------------------------------|------|------|------|------|------|--|
| Solar Cell:                        | Poly Crystalline 156.75×156.75mm |      |      |      |      |      |  |
