离网控制逆变一体机

### 性能特点

- ( 1 ) 可靠性 : 用于新能源发电的电源往往安装于无电山区、牧区、边防、海岛等交通不便地区 , 一旦电源故障修复就较为困难 , 因此对电源的可靠性提出较严格的要求 , 如日夜温差大、高海拔地区空气稀薄而引起的散热、绝缘、以及远途运输问题 ;
- ( 2 ) 高效率 : DC/DC 、 DC/AC 两级变换效率高达 94.5% 目前新能源发电的每度电成本偏高 , 太阳能电池板的价格昂贵 , 提高逆变电源的效率可降低太阳能电池板的容量 , 从而减少投资 ;
- ( 4 ) 内置带 MPPT 的太阳能电池或风力发电充电控制器 , 精度达 99.9% , 从而方便地构成高效的新能源发电系统 ;
- ( 5 ) 使用方便 : 完善的设计具有可操作性 , 良好的拆装性 , 便于维护 ;
- ( 6 ) 微电脑芯片智能控制 , 充放电各参数点可设定 , 适应不同场合的需求 ;
- ( 7 ) 控制电路与主回路完全隔离 , 具有极高的抗干扰能力 ;
- ( 8 ) 采用 LCD 液晶显示屏 , 中英文菜单显示 ;

- ( 13 ) 具有温度补偿功能 .

### Performance characteristics:

- ( 1 ) Reliability: power for new energy power generation is often installed in mountainous and pasturing areas, borders and islands that have no access to grid or convenient transportation. Once the power cut occurs, the repair work will be very difficult. Therefore, there are strict requirements for the power reliability, avoiding cooling, insulation and long-distance issues caused by huge temperature gap between day and night, as well as the thin air of high altitudes.
- ( 2 ) DC/DC, DC/AC the two conversion efficiency is up to 94.5%. The current cost for one KWH is still high, and the solar panels are expensive. Improving the efficiency of the power inverter can reduce the capacity of the solar panels, thereby reducing the investment cost.
- ( 3 ) Built-in solar MPPT or wind power charge controller, accuracy of 99.9%, thus easily constitute a new and efficient energy generation systems;
- ( 4 ) Easy to use: the perfect design is easy to operate, disassemble and maintain;
- ( 5 ) Microcomputer intelligent control chip is able to set up parameters of charge and discharge to meet the needs from different occasions;
- ( 6 ) Control circuit and main circuit are completely isolated to achieve high anti-jamming capability;
- ( 7 ) LCD display in Chinese and English menu;
- ( 8 ) Protection function: a variety of protections and alarm function;
- ( 9 ) With RS485/232 communication interfaces that are convenient for remote communications and remote control.
- ( 10 ) With multiple alarm functions
- ( 11 ) Clock display function
- ( 12 ) Temperature compensation function
