

# SP-136K

SP Series String Solar Inverter

**More power generation**  
Max. efficiency 99%, Euro efficiency 98.80%  
12 MPPTs for tracking maximum PV power  
Supports bifacial PV modules with max. PV current 13A

**Low system cost**  
Up to 24 PV strings  
Support aluminum cable access, saving cable costs  
Support PLC communication, save communication cable

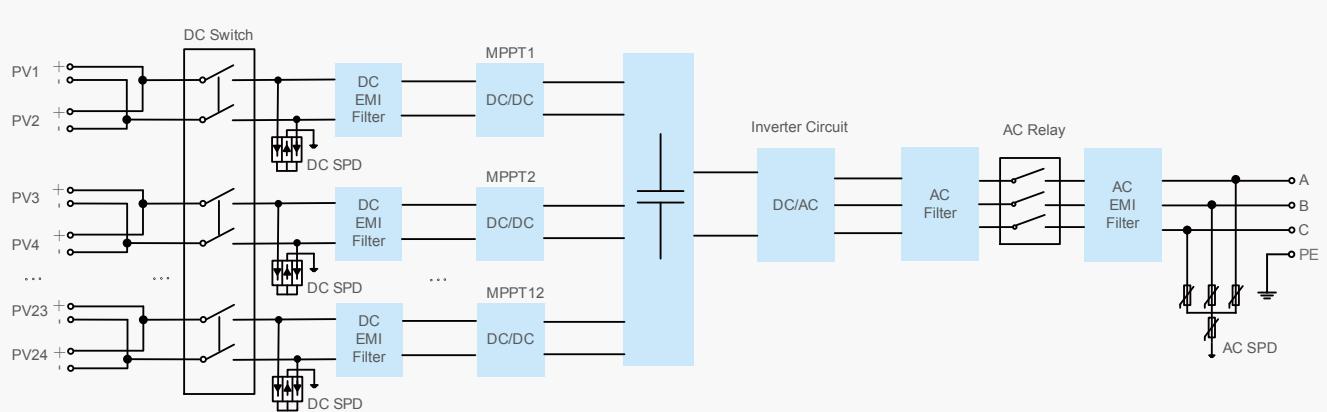

**High reliability**  
Cooling fan with IP68 protection level  
Integrated string monitoring function  
Standard connection terminal for quick installation

**Grid friendly**  
Active power derating and reactive power adjustable  
Low harmonics and fast response for grid regulation

## Circuit

|   | SP-136K                                   |
|---|---|
| <b>Input (DC)</b>                         |   |
| Max. PV input voltage                     | 1100V                                     |
| Max. input current                        | 26A*12                                    |
| Rated input voltage                       | 800V                                      |
| MPP voltage range                         | 200~1000V                                 |
| MPP voltage range for nominal power       | 600~850V                                  |
| Number of MPPT trackers                   | 12  |
| Max. number of PV strings per MPPT        | 2   |
| <b>Output (AC)</b>                        |   |
| Rated output power                        | 136kW                                     |
| Max. output power                         | 150kW                                     |
| Rated grid voltage                        | 540V                                      |
| Grid voltage range                        | 459~594V                                  |
| Max. output current                       | 161A                                      |
| Rated grid frequency / range              | 50Hz/45~55Hz, 60Hz/55~65Hz                |
| Output current harmonic(at nominal power) | <3%                                       |
| Power factor at nominal power / range     | >0.99/0.8leading to 0.8lagging            |
| <b>Protection</b>                         |   |
| DC reverse connection protection          | Yes                                       |
| Ovvoltage protection                      | DC Type II/AC Type II                     |
| Leakage current protection                | Yes                                       |
| Grid monitoring                           | Yes                                       |
| Insulation monitoring                     | Yes                                       |
| Anti-island protection                    | Yes                                       |
| <b>Efficiency</b>                         |   |
| Max. efficiency                           | 99.00%                                    |
| EU efficiency                             | 98.80%                                    |
| <b>General Data</b>                       |   |
| Isolation method                          | Transformerless                           |
| Self-consuming in night                   | <3.5W                                     |
| Protection level                          | IP65                                      |
| Noise                                     | <60dB                                     |
| Temperature                               | -30 C ~+60 C                              |
| Allowed humidity(non condensing)          | 0-100%                                    |
| Cooling mode                              | Temperature controlled forced air cooling |
| Max.operating altitude                    | 4000m (>3000m derating )                  |
| Communication port                        | Standard:RS485, Optional:PLC              |
| Dimensions (WxHxD)                        | 1018x630x339mm                            |
| Weight                                    | 95kg                                      |
