

# Ground Racking Systems

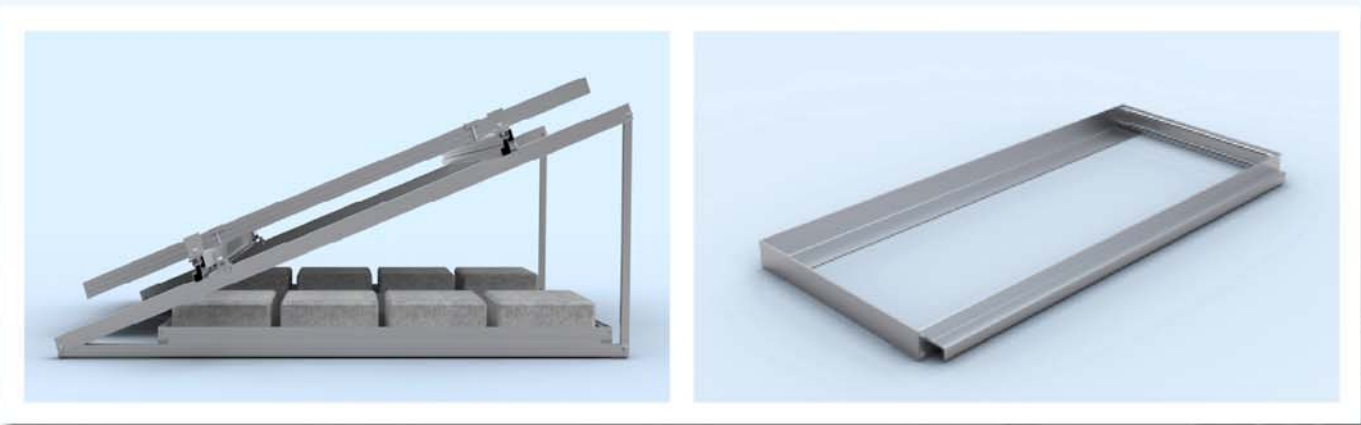

## KM-W : Ballast Foundations

The KM-W Series of KNE ground racking systems are designed for areas where uneven terrain exists or in areas where mounting foundations into the ground are unsuitable. KM-W is also suitable for portable roof top installation.

### Features

- Ballast container manufactured with anodized aluminum channels
- Designed for rapid mounting assembly and suitable for various ground types

Ballast Foundation Tilt Frame

Ballast Tray

- **Easy Setup:** Precision cut aluminum frame combined with concrete ballasts enables easy assembly as well as introducing portability.
- **Non-Invasive Mounting:** Drilling or mounting anchors/fasteners not required.
- **Flexibility:** Easily deployed on almost all surfaces and tested to comply with international standards.
