

Metal Rooftop Solar Mounting System

Series Name : MR-II

Technical Data

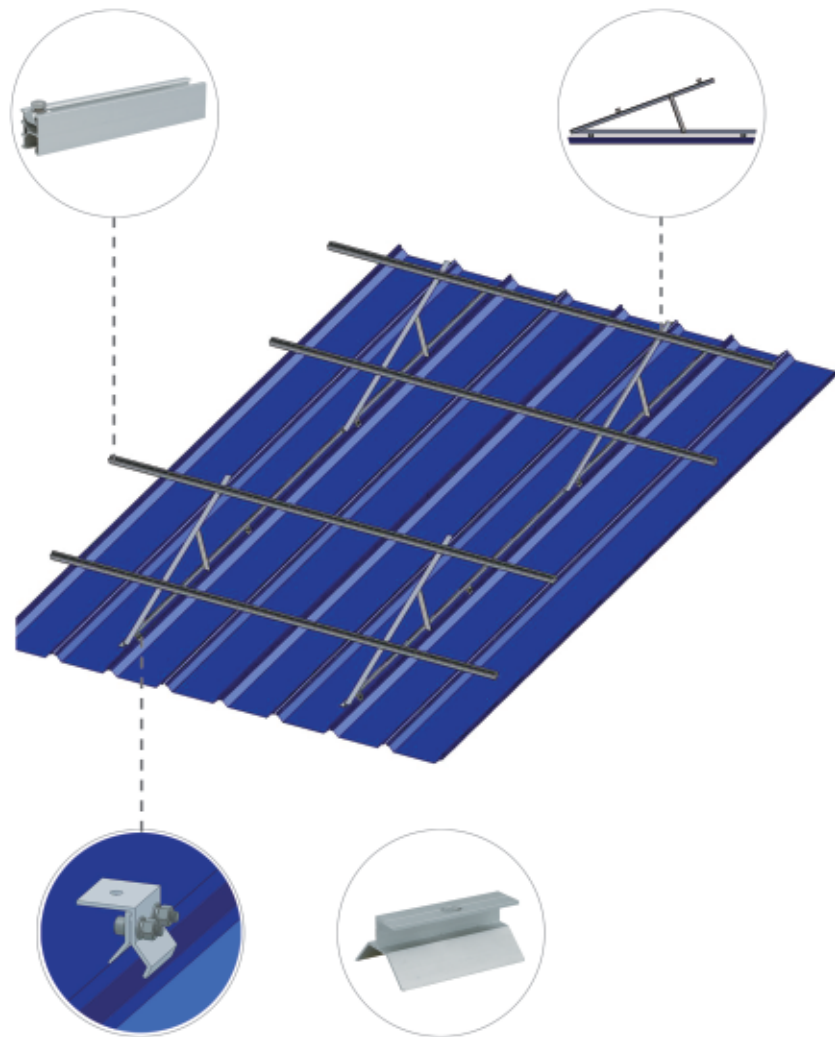

- Solar system: metal rooftop solar system
- Roof type: industrial or commercial roof top
- Material: hot-dip galvanized steel & Aluminum alloy & stainless steel
- Max snow load: 0.8 kn/㎡
- Max wind load: 32 m/s
- Mounting angle: customized design; fixed
- Module: framed crystalline module, unframed thin film module
- Module connection: middle & end clamp

Features

- Triangle supporting frame maximize module power generation
- Ingenious connection design between clamp & metal roof
- No destroy to the metal roof & keep roof water proof
- Material saving & Cost efficient
- Quick & easy mounting
- 10 years durability warranty
- 25 years anti corrosion warranty
