

## U Bolts Steel Pipe Solar Ground Mounting

STO U Bolts Steel Pipe Solar Ground Mounting is applicable for the PV array system on the open fields.

The steadiness and safety of this system is compatible with the structural mechanics and construction acts.

### Main Components

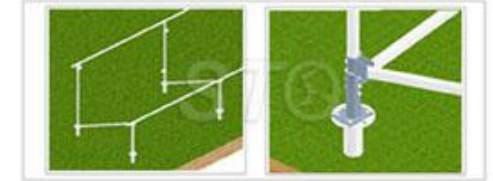

### Installation Step

#### Step1: Piling

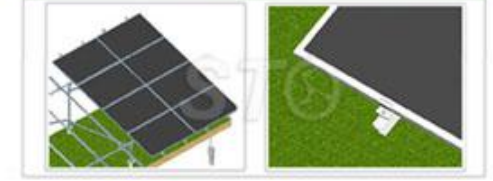

#### Step2: Install Structure

#### Step3: Install Rail

#### Step4: Install Panel

### Main Parameters

- \* Installation Site: Open field
- \* Installation Angle: 10-60 degree
- \* Max Wind Speed: 60m/s
- \* Max Snow Load: 1.4KN/m<sup>2</sup>
- \* Material: Hot-Dipped Zinc Q235B, A1 6005 T5
- \* Standard: AS/NZS 1170, SGS
- \* Warranty: 10 years warranty, 20 years duration

### Feature & Benefit

- \* High Pre-assembled parts, Save the cost of labor and installation time.
- \* Design and check the structure according to the structural mechanics and construction acts.
- \* Compatible with any types of solar panels.
- \* 10 years warranty, 20 years duration.
