## Mounting-System South

**SOLTOP** offers a flat roof mounting systems for large photovoltaic arrays on industrial and commercial buildings. The patentpending flat roof mounting systems of the SR-series were developed specifically to meet the requirements of largescale on-roof systems.

They are lightweight, aerodynamic, self-supporting photovoltaic racking-systems made of aluminium. Installation is without roof penetration and they add only a slight additional load to the roof. The use of bitumen-free building protection mats as an installation foundation offer additional protection for the roof membrane.

### Convincing Features:

- ▶ easy and safe
- ▶ corrosion-resistant and statically examined
- ▶ certified by TUV-Rheinland
- ▶ approved by the German Institute for Building technics
- ▶ Made in Germany

approved

## Mounting-System South variants

### SR 100/20

...suitable for photovoltaic-modules with a width of 950 - 1.065 mm

#### Technical Specifications

Inclination	20°
Rail length	0,7 - 6,0 m
Modul width	950 - 1.065 mm
Distributed load	ca. 7,0 kg/m <sup>2</sup> *
Liniar load	ca. 16,8 kg/m *
Material	aluminium / stainless steel

\* assuming a module weight of 19 kg

### SR 100/10

...suitable for photovoltaic-modules with a width of 950 - 1.065 mm. Inclination 10°

#### Technical Specifications

Inclination	10°
Rail length	0,7 - 6,0 m
Modul width	950 - 1.065 mm
Distributed load	ca. 8,0 kg/m <sup>2</sup> *
Liniar load	ca. 18,1 kg/m *
Material	aluminium / stainless steel

\* assuming a module weight of 19 kg
