

Terrace Mounting system B

Terrace Mounting B delivers flexible, effective and durable designs to mount 6 or 8 panels per pole. Our Post Mount systems are very high quality products designed to save you time and money on site. All Terrace Mounting system B PV Post Mount systems use our patented PV rails ensuring strength, flexibility and ease of installation. The innovative adjustable angle cap enables the angle to be easily and quickly adjusted from 0° to 60°.

10% more energy

The innovative steel cap and support pole allow the angle to be adjusted according to the seasonal sun altitude to maximize the generating efficiency.

Excellent compatibility

Patented rail, Z-module and unique adjustable cap eliminate the need for onsite cutting, making the PV installation time and cost efficient. Designed as a universal mounting system, PV PostMount is compatible with all of the major framed PV modules on the market

High quality

Strict quality control over materials and finished products ensure optimum strength and long life for your installation. The angle of the rails has been designed to maximize the harvest of solar power according to your local latitude.

10-Year Warranty

Guaranteed Durability: All components are made of quality extruded aluminum and stainless steel. The high corrosion resistance guarantees the maximum possible lifespan and is also completely recyclable. It provides a 10 year product warranty for your peace of mind.

Features

- Installation Site: Open field
- Installation Angle: <60°
- Building Height: <20m
- Wind Load: <60m/s (<216km/h)
- Snow Load: <1.4KN/m²
- Applicable module: Framed
- Module Orientation: Horizontal or Landscape
- Module compatibility: Universal
- Material: Aluminum Alloy, Stainless Steel, Galvanized Steel Pole
