INCLINED HOUSETOP

W4 inclined roof hook pv bracket system

28°

- 1. Install the parts less, fast installation, cost-effective
- 2. Unique matrix design makes the system more stable
- 3. Strict quality control to ensure the service life of the stents.
- 4. The high density of structural design to ensure the least amount of container space.

Installation PLAllocation	Inclined housetop
Installation Angle	28 °
Wind load	36km/s
Snow load	16KN/m ²
Apply panel type	Frame or no frame
Panels arrangement standard	The vertical or horizontal AS/NZS1170 DIN 1055 JIS C 8956:2011 Intemational Building Code IBC 2009 California Building Cod e CBC 2010
The material	AL6005-T5(Yang level surface oxidation), 8.8 hot zinc impregnation
Fasteners	SUS304
Spare parts color	Aluminum alloy Natural white or color according to customer's requirements
quality assurance	10 years
