

## Floating Solar System

Stonergy Floating PV Mounting System is applied to solar pv power plant installation on the water. Adopting HDPE material, it has passed the Hunt Water Absorption Test, Anti-Aging Test, Anti-UV Test etc. It compatible with various solar module, save the cost; Strong weather ability, easy to operation and maintenance.

### Main Components

**A** Main floating body

**B** Aisle floating body

**C** Rear leg

**D** Front leg

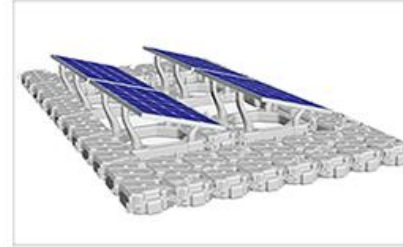

**E** Bolt and nut

**F** Thumb lock

### Installation Type

Single Side

Double Sides

### Main Features

1. Adopting HDPE material, it has passed the Hunt Water Absorption Test, Anti-Aging Test, Anti-UV Test etc;
2. Modular design, simple and convenient splice installation;
3. Increase the volume of floater to add the buoyant force of floater;
4. The floater is made of high density polyethylene, which ensures its long service time;
5. Various array design, easier to combine;
6. Realize symmetrical facing array, increase the installation capacity, maximize the efficiency of power generation;
7. Compatible with various solar module, save the cost;
8. Strong weather ability, easy to operation and maintenance.
