

2.3 CSUNPOWER Mounting Structure

One of the most important features of mounting system is the duration under different weather conditions. Structure must be solid and reliable, able to withstand atmospheric erosion, wind loads and other external effects, safe and reliable installation, with minimal installation achieve the maximum effect of the use, almost maintenance-free surface, and reliable maintenance, these are to do a program selection the important factor to consider. System-based solution makes the installation of that devices become commercially possible, in order to achieve the best result..

- Designed for crystalline module installation.
- Anti-leakage design.
- Water chute on the aluminum rail.
- EPDM sealing rubber between modules, etc.
- Easy Installation.
- Aesthetical appeal.

CSUNPOWER™

CSUNPOWER™

- Widely used for both crystalline and thin film modules.
- Easy & quick installation.
- Only 4~5 kinds of components and no more than three kinds of tools in whole system fixation.
- All system components are made with high quality aluminum & stainless steel.

- Adoptable to all kinds of crystalline modules and certain thin film modules.
- Direct foundation bolt, concrete base or bear load are the possible solution for ground installation.
- System installation inclination is adjustable according to requirement.
- Easy installation, only three kinds of tools could finish the installation.
