

All-aluminum carport solar mounting system

The carport system is suitable for home, shopping mall or other outdoor places. The system can be easily installed and adjusted to fit any size or shape of carport, making it a versatile option for many applications. Additionally, the aluminum construction can withstand extreme weather conditions and ensures that the system will last for many years without requiring maintenance or repairs. Our carport systems have been sold to Africa, Europe, Southeast Asia, South America and other regions. And this system can be customized according to the number of vehicles to be parked by the customer.

Highly pre-assembled main structure for solar modules landscape or portrait 5°/ 8°/10° inclination or customized and engineered to project maximal span up to 5.4m cover up to 2 parking spaces per span.

Technical features:

Product name	Standard carport system
Application	Solar parking structure
Inclination	5°, 8°, 10° or customized
Material	AL6005-T5, SUS304
Finish	AL 6005-T5 Anodized
Module orientation	Landscape or Portrait

Product advantages:

1. Good heat absorption.
2. Good waterproof and rain protection, convenient installation, and flexibility.
3. Make full use of the original site to provide green energy.
4. Suitable for frame panel: Poly modules, double glass module etc.
5. Excellent quality, Low price
6. Provide customized services

Application:

Installation place	home, company, shopping mall, large parking lot
Parking category	battery car/bicycle, car, bus
Number of parking Spaces	1 parking space, 2 parking Spaces, 3 parking Spaces, multiple parking Spaces (large span)
By row	single row parking space, double row parking space
