

PMA-Type

A small kit that provides simple mounting of a solar module onto any suitable horizontal or vertical surface, including pole mounting. Manufactured from Aluminium, this mounting kit is suitable for a variety of applications for telecommunications, remote power, lighting and monitoring.

The kit is supplied complete with an installation manual, and all fasteners required to allow for the different types of solar module. Pole mounting is achieved with stainless steel banding to allow for flexibility of pole diameters from 40mm to 105mm. Wall or horizontal mounting can also be achieved using the two M8 holes provided.

Product Information

- Material: 6082-T6 Aluminium
- Fasteners: A4 Stainless steel
- Tilt Angles: 10° - 70°
- Suitable for: Most modules up to 50W
