

The SP PRO grid forming battery inverter is one of the most flexible and intelligent available in the market today. With our modular approach, systems with up to 240kW of continuous battery inverter capacity can be realised. Using sophisticated communications up to 480kW of managed AC Coupled solar can be installed.

Battery Voltages of 24V, 48V and 120V are accommodated. Additionally, by incorporating unlimited DC Coupled solar, wind, backup generator or a grid supply,* our ethos of never being without power is always met.

The same SP PRO is suitable for both Off-Grid and Solar Hybrid (On-Grid) installations for residential, commercial and industrial applications. Our inverters provide true transition from an On-Grid to an Off-Grid system (and vice versa) with a simple on-site setting change.

Selectronic inverters have been made in Australia since 1981 and since then have powered 1000's of sites from the tropics of Indonesia, the mountains of the Himalayas, the deserts of UAE, the outback of Australia and on suburban homes throughout the world. In fact, nobody has more experience in this market sector than Selectronic.

At Selectronic, we strive for the lowest total cost of ownership. New firmware releases are generally backward compatible ensuring systems are not placed in a redundant technology corner. Engineers and installers are supported by people who talk your language, understanding power systems with the breadth of knowledge and experience that you require.

Selectronic has world-renowned inverters that offer grid independence, proven reliability, now with Modbus RTU ultimate flexibility, retrofit capability and class leading warranties.

240kW of continuous load power can be achieved, using
4x 20kW SP PRO inverters per phase on a three-phase system

- Australian owned, designed, manufactured and supported
- More features included as standard 'inside the box' than any other inverter
- AC continuous load and charging power from 3kW to 240kW with up to 480kW of managed AC Coupled solar
- Up to 4 SP PRO inverters per phase: Single-phase, dual-phase, split-phase or three-phase
- Off-Grid and On-Grid* (grid backup and grid feed), marine and mobile operation
- All output ratings are continuous 24/7
- Lithium, lead acid, lead carbon battery compatible
- Modbus RTU
- Easily configurable for domestic and commercial applications
- Inbuilt configuration wizard for super-fast setup
- AC Coupling recovery mode to easily recharge from AC Coupled solar
- AC or DC Coupling compatible
- Retrofit existing systems
- Integrated generator controller to maximise system efficiency
- 63A or 125A internal transfer contactor standard, or up to 1000A per phase external
- Up to 10-year warranty**

*On Grid connection only applies to SPMC480-AU, SPMC481-AU, SPMC482-AU, SPLC1200 and SPLC1202
