

With advanced AGM technology, there is no flowing acid in AGM batteries. Compared with traditional batteries, AGM batteries have made revolutionary improvements in terms of discharge reception capabilities, deep cycle capabilities, and safety. AGM batteries are specially designed for cars with advanced start-stop systems. It can provide energy under long-term idling conditions.

AGM Battery									
Model	Voltage (V)	Capacity (20HR/Ah)	Reserve capacity (min)	CCA	Dimension (mm)				Weight (Kg)
					Length	Width	Height	Total Height	
AGM50	12	50	80	500	207	175	190	190	14.60
AGM60	12	60	100	660	242	175	190	190	18.00
AGM70	12	70	120	720	278	175	190	190	20.00
AGM80	12	80	140	800	315	175	190	190	23.00
AGM92	12	92	160	850	353	175	190	190	26.00
AGM105	12	105	190	950	394	175	190	190	29.20

EFB batteries are an enhanced version of traditional flooded batteries. With optimized design and formula, they have improved discharge capacity and better deep cycle capabilities.

EFB batteries are designed specifically for entry-level start-stop systems to fit low or high temperatures and rough road conditions.

EFB Battery									
Model	Voltage (V)	Capacity (20HR/Ah)	Reserve capacity (min)	CCA	Dimension (mm)				Weight (Kg)
					Length	Width	Height	Total Height	
EFB60	12	60	80	550	242	175	175	175	15.00
EFB60	12	60	100	640	242	175	190	190	17.10
EFB70	12	70	120	650	278	175	175	175	16.50
EFB70	12	70	120	680	278	175	190	190	19.60
EFB80	12	80	140	750	315	175	190	190	22.30
EFB75	12	75	130	700	315	175	175	175	19.80
EFB65	12	65	110	600	232	173	230	230	17.30
EFB70	12	70	120	660	260	172	230	230	18.80
