

TOPCON MONOCRYSTALLINE 132TN12

CWI SOLAR PANEL

Half**Z**Cut

High Conversion Efficiency High panel efficiency to guarantee high power output

Self-Cleaning And Anti-Reflection Glass Coating glass for self-cleaning reduces surface dust

Outstanding Low Irradiation Glass Outstanding panel performance even in weak light conditions

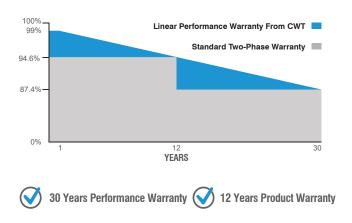

Excellent Durability Wind load up to 2400 Pa, Snow load up to 5400 Pa

 $0 \sim +5W$ Positive Power Tolerance

Easy Installation

FRAME SECTION [A] SECTION

* The specifications are obtained under the standard test conditions: 1000W/m2 solar irradiance, 1.5 Air Mass and cell temperature of 25°C. Measurement uncertainty for all panels is 3%. The actual transactions will be subject to the contracts. These parameters are for reference only and it is not a part of the contracts. The technical specifications in this document may vary. For more information, refer to the "Installation Manual".

* For roof, facades and installations on similar surfaces, solar panels should be mounted over a fire-resistant covering suitable for this application, with adequate ventilation between the back of the solar panels and the mounting surface. Improper installations are hazardous and may spark a fire. Solar panels must not be mounted on structures and roofs which are made of not fire-resistant materials such as plastic layer, transparent plastic, PVC or similar materials without any fire-protection layer. Usage and installation not in accordance with the guidelines as outlined in the installation manual will terminate the warranty. Please refer to the installation manual and the warranty documents for further details. * CW Enerji reserves the right to change the specification of products without prior notice.
