

Monocrystal PV Module

SS8-72HS 525-550M Series

Introduction

Assembled with multi-busbar PERC cells, the half-self configuration of the modules offers the advantages of higher power output, better temperature-dependent performance, reduced shading effect on the energy generation, lower risk of hot spot, as well as enhanced tolerance for mechanical loading.

Higher output power

Lower temperature coefficient

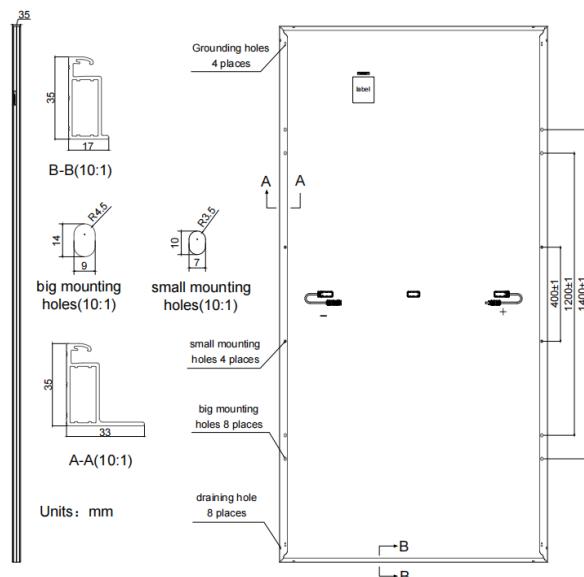

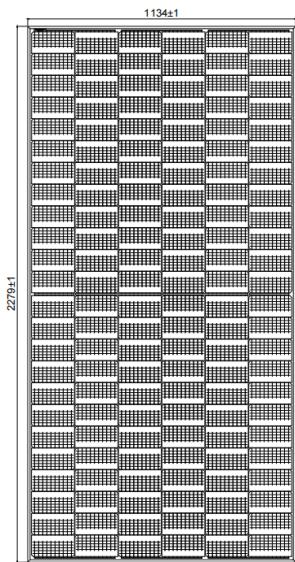

Less shading and lower resistive loss

More reliable, more stable power generation
