**Note 1:** Power factor (cosφ)= 1 and Vac nominal.  
**Note 2:** THDi is lower than 3% for inverter power greater than 25%.  
**Note 3:** P-Q capability is semicircular with radius equal to Smax for all MPPT range.  
**Note 4:** From 45°C to 53°C derating of power.  
**Note 5:** Above 1.500m a.s.l. derating of the power of 1% per 100m.

**Note:** Each inverter must be connected separately to its own LV/MV transformer or it has to be connected to a separate LV secondary input of the LV/MV transformer. Two or more inverters cannot be connected in parallel to the same LV secondary input of the LV/MV transformer.
