

D-Dome 10° System

The solution for
double-sided elevation

- ▶ A system which provides optimal surface utilisation and yields for roofs with limited ballasting options
- ▶ Aerodynamically optimised as a result of wind tunnel testing
- ▶ Quick and easy handling

D-Dome can also be mounted on
trapezoidal sheet metal roofs.

Components

Dome D1000 and Dome SD

Narrow elevation module support element for two-sided elevations

SpeedRail with building protection mats

- ▶ SpeedRail available as short or long rails
- ▶ Building protection mats also laminated with aluminium

Ballast Management

SpeedPorter: For quick and easy ballasting

Technical data

	D-Dome
Scope of application	Flat roofs <math>< 5^\circ</math> with membrane, bitumen and concrete or gravel roofs; also trapezoidal sheet metal roofs with continuous mounting rails
Fastening type/roof fixture	Stable, with ballasting if necessary; no roof penetration up to 3°
Requirements	<ul style="list-style-type: none"> ▶ Permissible module dimensions (L x W x H): 1386-2080 x 950-1100 x 30-50 mm ▶ Minimum system size: 2 supports (4 modules) ▶ Roof inclination of up to 5°
Technical specifications	<ul style="list-style-type: none"> ▶ Thermal separation after max. 11 m (trapezoidal sheet metal 8.4 m) ▶ Minimum clearance to roof edge 600 mm
Inclination angle	10°
Material	<ul style="list-style-type: none"> ▶ Mounting rails, D-Dome, Dome SD, Module Clamps, Rail Connectors: Aluminium EN AW-6063 T66 ▶ Building protection mat with or without aluminium lining (PUR-bound rubber granules) ▶ Small parts: Stainless steel (1.4301) A2-70
