

## Aluminium Ground Mounting System

System key features:

1. Modular design, standardized proposal.
2. Special design, strong wind-resistance, use steel main materials.
3. Standard prefabricated concrete foundation.
4. Easy installation, reduce construction cost.
5. Suitable for open field or ground site.

### Technical Parameters

System Type	Ground Mounting System
Foundation	Concrete, Ground Screw
Tilt angle	5-60°
Wind load	80m/s
Snow load	1.6KN/m2
Module layout	Vertical or horizontal
Design standard	AS/NZS 1170/ DIN 1055/ JIS C 8955/ California Building Code CBC 2010/

	International Building Code IBC 2009
Material	Al6005-T5(anodizing) ;Al6063-T5(anodizing)
Fasteners	SUS304
Accessory parts	Al6005-T5(anodizing)
Warranty	10 years
