Module Efficiency

Warranty on power output

Advanced surface treatment, lower surface reflection and 5BB cell design can reduce the series resistance and improve the module efficiency

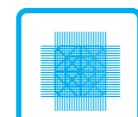

Microcrack resistant Double glass structure enhance reliability, triple EL tested of high quality control.

Designed for high voltage systems of up to 1500 VDC, increasing the string length of solar systems and saving on BoS costs

All the modules are sorted and packaged by amperage, reducing mismatch losses and maximizing system output.

Double glass structure which enhance the reliability of anti-microcracks, reduce the snail tracks phenomenon

Strict quality control, meeting the highest international standards: ISO 9001, ISO14001 and OHSAS18001

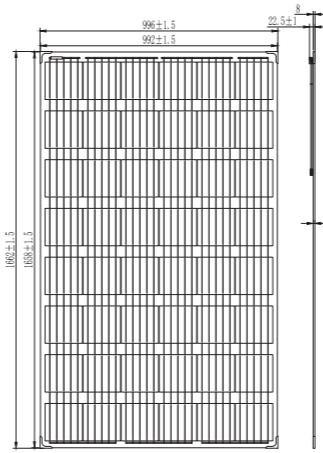

PID resistant

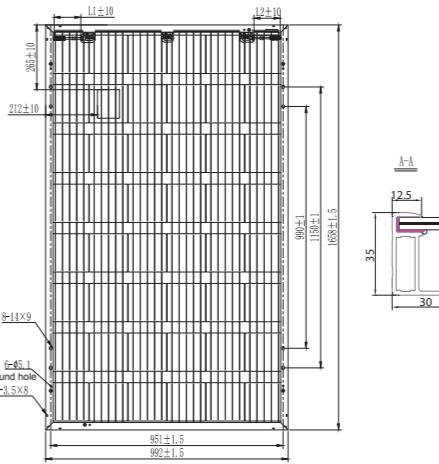

Positive tolerance 0~+5w guaranteed
