

Geco Agricultural Solar Mounting System

GASMS-GS

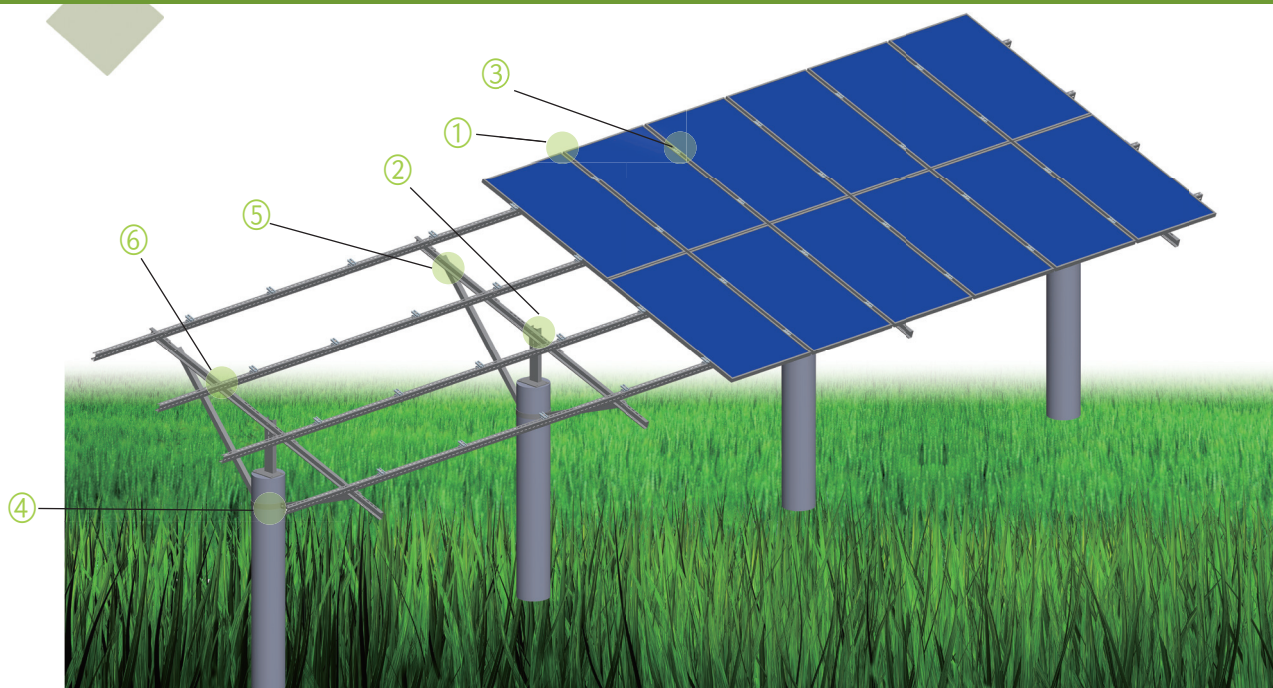

Product Features:

- Land utilization is high: can be used for both power generation and planting vegetables.
- The electricity can be used for farming, lowering the power generation cost.
- The green house is good for the growth of various plants.

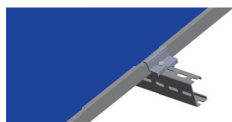

Technical Parameters:

Foundation:	Prestressed concrete pipepile
Module Layout:	Landscape / Portrait
Maximum Wind Load:	40 m/s(customizable)
Maximum Snow Load:	1.4KN/m ² (customizable)
Module Angle:	Based on customer requirement
Material:	Hot-dip Galvanized Steel
Warranty:	15 Years
