

Waterproof frame

(SS-WMF-01)

Component List

System introduction

This product is a special aluminum frame, which is integrated with the solar module. The solar modules with this frame are easy to install and laid on the roof like tiles. They have good leak proof function. With a few racks, it has wide applicability. No additional sealant and packing strip are needed, and no outdoor aging problem. Outdoor service life is the same as that of solar module. On the basis of meeting the mechanical calculation, customers can achieve the best cost.

Technical Data

Installation site: Building roof
 Installation angle: 5-45 degree
 PV modules: framed
 Module layout: Vertical or horizontal
 Max wind speed: 45m/s
 Material: Aluminum-galvanized sheet , aluminum & SUS304, hot galvanized fasteners
 Color: Natural or in accordance with customer requirements
 Standards: BS6399, JISC 8955, Eurocode 1, DIN 1055, AS/NZS 1170 and other standards
 Warranty: 10 years warranty
