

Uni-Base HALD / VALR framed & frameless

YOUR ADVANTAGES

- Easy assembly without sealing of the surface area
(no concreting necessary)
- Inclination: Standard 25°,
individual design upon inquiry
- Optimal adaptation to the prevailing terrain conditions,
even in uneven terrains
- Universally for all frameless and framed and frameless modules System
- Designed for snow-load zone II and wind zone I
(other dimensioning upon inquiry)
- Small amount of components which allow for a faster installation

TECHNICAL DATA	
Sturd distance	3.04 m
Width/Module table	6.20 m
Height	Approx. 2 m
Module inclination	25°, or other
Height above ground	Approx. 0.45 - 0.80 m (bottom edge of the module table)
Suitable module types	Thin-film and crystalline modules
Max. count of module tables ¹⁾	5
Material	Steel (S 235, hot-dip galvanized) Aluminium (EN AW 6060)

¹⁾ due to temperature strains
