

Agriculture Solar PV System

Advantages

1. Land utilization is high: can be used for both power generation and planting vegetables.
2. The electricity can be used for farming, lowering the power generation cost.
3. The green house is good for the growth of various plants.

Technical Specifications

Structure Style:	Open roof structure
Foundation:	Concrete/Ground Screw
Module Size:	Any size
Module Layout:	Horizontal / Vertical
Module Angle:	According to the roof slope
Maximum Wind Load:	40m/s
Maximum Snow Load:	1.4KN/ m ²
Material:	Hot-dip Galvanized Steel
Duration:	25 Years
Warranty:	15 Years
