

# Module Mounting System : Water Floating Mounting System

## Floating Mounting System

- Designed with great flexibility both for commercial and residential roof.
- Does not occupy land surface, it is installed over the water surface. This floating mounting system extremely helps to reduce water evaporation.

## Product Features

### 1. Safety Reliability :

The each component has passed through SGS testing and certification to ensure the stability and security of the system.

### 2. Convenient Installation :

Water below the floating surface acts as cooling agent for the solar panels, which eventually will help to increase the electricity production by 10%.

### 3. 10 Years Warranty :

Using high intensity Anti-UV materials, it ensures the strength and anti ageing of the structure.

Main Floating Body

Connector

## Technical Parameters

Installation Site	Water Surface
Base	Main Floating Body
Material	Weather proof plastic, Aluminum
Wind Load	$\leq 30$ m/s
Snow Load	$\leq 1$ kN/m
