

KK 30 LH BALER

The KK 30 LH is the perfect solution for businesses that are restricted by height within their factory, where, due to the volume of waste a smaller model would not cope. This low height baler exerts 20 tons of force, compacting card and plastic to a fraction of its size and produces bales of up to 300 kgs.

The KK 30 LH is a fully automated baler, indicating when the bale is ready and can be ejected onto a pallet for ease of removal. It also has a pull down door which helps to maximise the load put into the baler prior to compaction.

SPECIFICATIONS

Suitable applications	Paper Card Plastic Cloth Polystyrene Metal Containers PET Bottles
Dimensions (W x D x H)	1800 x 1100 x 1986 mm
Weight	1140 kg (approx.)
Power Supply	220 – 240 Volt single phase)
Motor	2.2 kW 16 Amp
Pressing Force	up to 20 Ton
Noise Level	68 decibels
Bale Dimensions (H x W x D)	1100 x 1200 x 800 mm
Weight	Up to 300 kg (depending on material used)
Cycle Times	45 seconds
Loading Aperture Size (H x W x D)	596 x 800 x 120 mm

*Please note specifications and product photos may vary.
