

THE SYSTEM

MOCO ES 04, shredder with slow and low noise running hexagonal working shaft. Low vibration and minimal maintenance, compact design, robust engineering, low power consumption, individually replaceable cutting discs. Cutting gap of the counter blades adjustable. Especially suitable for shredding turning and drilling chips, steel packing straps, electric cables.

THE ELECTRIC

The control of the AC geared motor is equipped with an automatic overload-dependent reverse control.

THE THROUGHPUT EXAMPLE

100 to 150 kg steel chips per hour for version MOCO ES 04 / 750.

THE DIMENSIONS

	MOCO ES 04/350	MOCO ES 04/550	MOCO ES 04/750
• Cutting section	345 x 300 mm	550 x 300 mm	755 x 300 mm
• Exterior dimensions	1,068 x 585 x 297 mm	1,381 x 586 x 330 mm	1,585 x 592 x 330 mm
• Weight	approx 255 kg	approx 305 kg	approx 360 kg
• Drive power	3 kW	5.5 kW	5.5 kW
• Voltage	400 V / 50 Hz	400 V / 50 Hz	400 V / 50 Hz

THE OPTIONS

- Customized hopper and frame (e.g. for 240 litres containers)
- Feeding device
- Sieves to obtain a specific final particle size
- Connecting funnel for extraction units

**SHREDDING TECHNOLOGY FROM
MOCO – PERFECTLY TAILORED TO
MEET YOUR REQUIREMENTS.**
